

Displaydoorparts.com Gasket Form

(This form is for locating Anthony, Ardco and DisplayRite Gaskets)

If you have Ardco Doors-

What is the model and serial number found on the Ardco tag that is located on the main frame of the door **SET (not the door frame)**? *This is typically found on trim frame of the set, on the inside portion of the walk in or reach in, out of customer view.*

Model _____ Serial _____

How many doors do you need gaskets for? _____

=====

If you have Anthony Doors-

What is the model number and date of manufacture is easily found by getting your face close to the glass and looking up and in between the panes of glass at the metal spacer bar. You may have to look on more then one doors spacer bar. Cat 769 is not the model or DOM but is in the same area. On one model of Anthony door, there's never a model number. That would be the Model 1000 and you will know you have a model 1000 if your gasket is NOT attached to the door but on the framing attached to the case instead. Make sure you do not confuse the date of manufacture with the date sometimes stamped directly onto the glass as that is not the DOM but a patent date.

Model # _____

Date of Manufacture # _____

EXACT outside door dimension _____

Who manufactures the case the doors are on? _____

How many doors do you need gaskets for? _____

=====

If you have DisplayRite (CoolRite & FreezeRite) Doors-

What is the model & serial number (See the Ardco description of where to find this)

Model _____ Serial _____

How many doors do you need gaskets for? _____

=====

Name: _____ Company: _____

Phone: _____ Fax or email: _____
